

# Introduction

**Virginia Cooperative Extension**

Virginia Tech • Virginia State University

Updated 9/2022

Welcome to the Virginia Cooperative Extension Master Gardener training program. The Extension Master Gardener (EMG) program is a volunteer education partnership with Virginia Cooperative Extension (VCE) dedicated to working with the community to encourage and promote environmentally-sound horticulture practices through sustainable landscape management. The EMG training program provides you with the organizational and horticultural training to launch community horticulture education programs to benefit your locality.

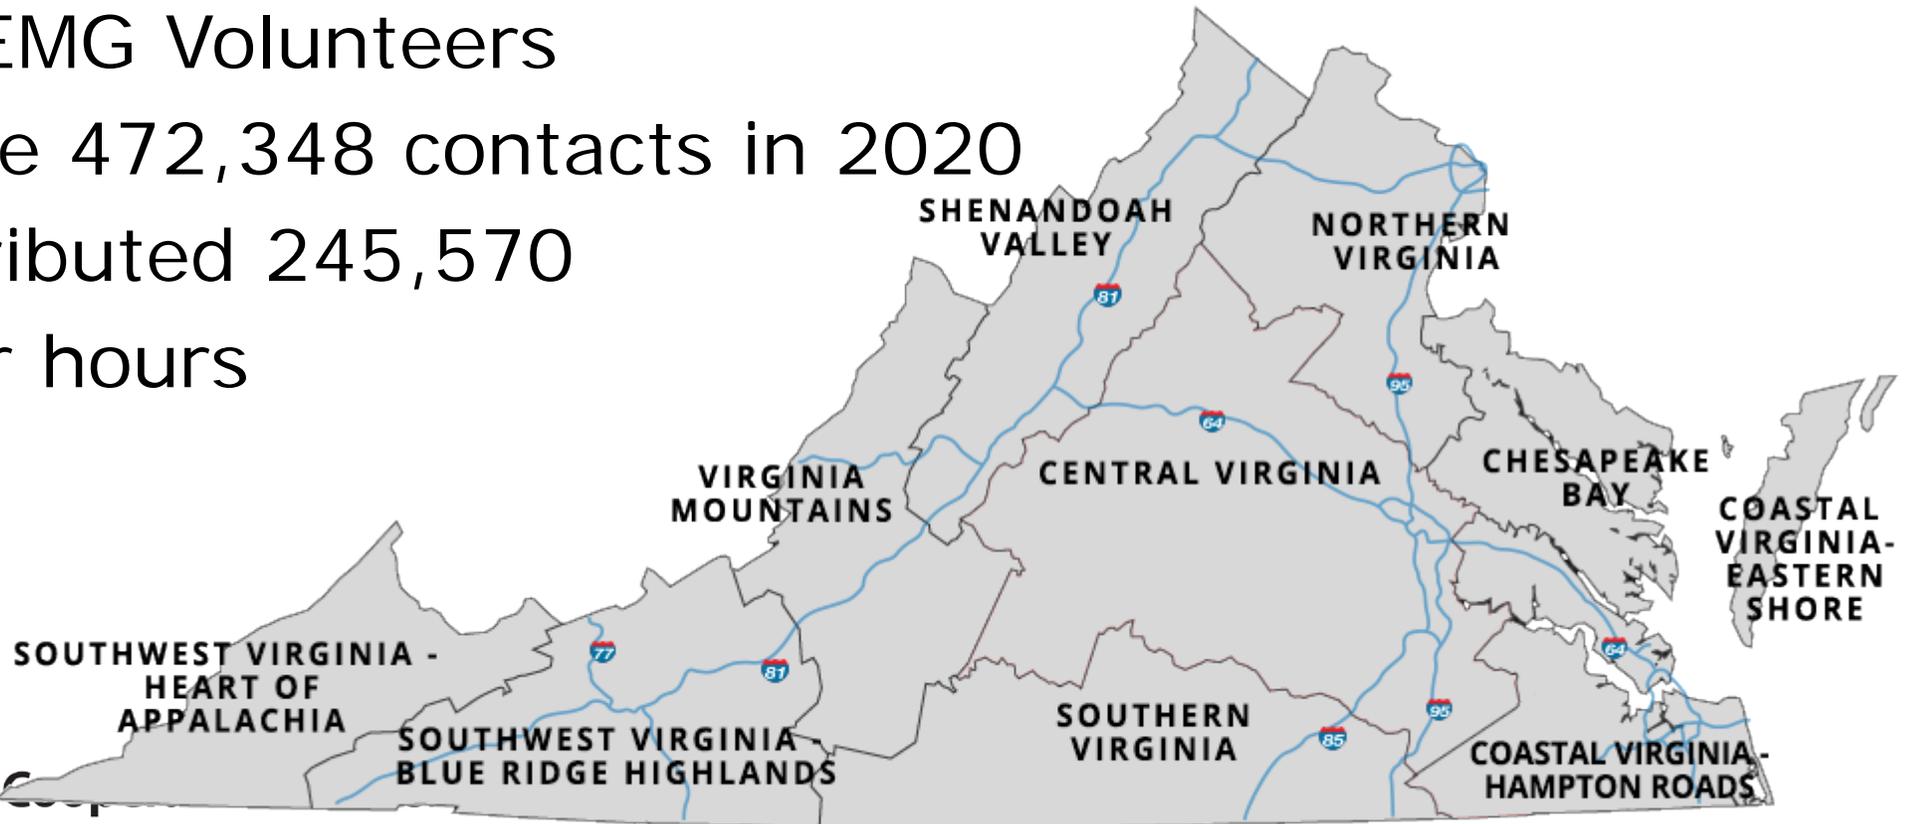

As an EMG you are an educator working on behalf of Virginia Cooperative Extension (VCE) and are expected to work within VCE policy to promote, inform, and work with communities, leaders, industry and individuals presenting programs on all aspects of horticulture, including turf landscape, vegetables, trees and shrubs and pest management practices.

# About the Virginia Cooperative Extension Master Gardener Program

- ✓ Made up of 60 EMG units
- ✓ 4,500 + EMG Volunteers
- ✓ Who made 472,348 contacts in 2020
- ✓ And contributed 245,570 volunteer hours

# Mission, Vision, and Values

## Mission

- Sharing Knowledge
- Empowering Communities

## Vision

- To be the Virginia Cooperative Extension volunteer organization extending horticultural and environmental outreach across the Commonwealth

## Core Values (Internal & External)

### Respect

- The environment, each other, and those we serve

### Accountability

- Wise stewardship of resources
- To our organization, our community, and each other

### Collaboration

- Willing to work with a diverse group to reach a common goal
- Actively seeking out partners

# Steps to Becoming an EMG

- *EMG Trainee*: A student taking the course until graduation
- *EMG Intern*: A student who has completed the theory portion of the course (including final exam) and is working on completing the 50 hours of hands-on field experience in horticulture-based education programs
- *Extension Master Gardener*: One who has completed the full EMG training program – theory and internship, and is actively volunteering
- *Advanced EMG*: One who has received specialized training in any of the advanced-level training programs and has completed the program requirements
- *Emeritus EMG*: A dedicated EMG who “retires” due to health or other reasons after 1000 hours of service or as determined by the coordinator or Extension agent

This course is designed to teach best practices for home horticulture and prepare Master Gardeners to teach these practices.

This a modularized, self-paced independent study, computer based program developed by the Bedford Extension Master Gardeners.

You will complete this course by:

- completing a series of modules
- Attending hands on labs
- Completing a final exam
- Completing 50 volunteer hours working in Extension Master Gardener projects within one year of class start

# Modules

- Modules are PowerPoint slides with topical content. They include required reading from the Master Gardener Training Manual, horticulture theory, links to additional information found on the internet, objectives, optional readings, tests of knowledge, videos, and quizzes (open book).
- Not every module has a quiz; If a quiz is included with the module, it is **required before attending the lab**. Quizzes must be passed at 70% overall average
- Not every module has a lab associated with it

# How to Navigate

You can work through this program on any computer, tablet, or smart phone. You can move through the slides (in the modules) by scrolling with the mouse or using the arrow keys (right arrow to go forward; left arrow to go backward). You can return to the beginning of any module by clicking on the house in the lower right corner of the slide.

The program works best if you download it onto your computer / tablet / phone.

Blue, highlighted, underlined words or phrases are links to sites on the Internet or somewhere else in the module; Click on the highlighted underlined word or phrase to get to the Internet site. To return to the module from a website, close out the file (x) from the open files bar.

The course includes 17 modules

Introduction

Lawns

Entomology

Fruits

Herbaceous Plants

Water Quality

Wildlife

Landscape Design

Plants

Indoor Plants

Botany

Plant Propagation

Plant Pathology

Soils & Nutrients

Vegetables

Pest Management

Woody Landscapes

Native, Non-Native, Invasive

# To complete the module you will

1. Read the assigned Chapter(s) in the Master Gardener Training Manual
2. Review the module slides which includes:
  - a. What you will learn in the module (objectives)
  - b. A slide presentation of the topic
  - c. Suggested readings on the topic
  - d. Test(s) of your knowledge
  - e. Lab information (if there is a lab)
3. Complete a module quiz (if required)(open book)

# Keep in mind...

As you read many different references, including web sites, keep in mind that some practices and recommendations will vary in different geographic regions of the country. If you find conflicting information in your readings, the *Virginia Cooperative Extension Master Gardener Handbook* and the Virginia Cooperative Extension web site <http://www.ext.vt.edu/>, are the authorities to use.

# Continued Learning and Finding Answers to Your Questions

No module will teach you everything about a topic, so it is important to know how to search for reliable information. If you type a search term (like “propagation”) into a search engine (like Google or Bing), you will be given many references. Each reference has a web address which identifies its “domain”. Examples of web domains include:

.gov a U.S. government agency

.edu a college –level educational institution

.org a not-for-profit organization

The most reliable sites are .gov and .edu. .org is the next most reliable. .com’s, commercial enterprises, may not be unbiased or research based.
